Journal of ALLOYS AND COMPOUNDS

Subject Index of Volume 286

Ab initio calculations
an ultrathin buried Si layer in GaAs studied by soft X-ray emission spectroscopy and surface X-ray diffraction: theory and experiment 31
$A^{III}B^{V}$ semiconductor
white beam pin-hole patterns of implanted layers 349
$A^{III}B^{V}$ semiconductors
interference fringes in plane-wave topography of Al_xGa_{1-x}as epitaxial layers implanted with Se ions 343
Absorption edge
the fluorescence emission from GaAs in the Laue case near the absorption edge 265
Additional absorption
valency change of Cr, Fe, Cu, Er, Ce dopants inside oxide compounds under proton irradiation 167
AlGaN
strain relaxation of $Al_xGa_{1-x}N$ epitaxial layers on GaN and SiC substrates 284
Amorphous layers
study of near-surface layers modified by ion implantation in Si wafers by grazing incidence X-ray reflectometry 337

Band structure
XANES study of K edges of Fe, Co, Ni, and Se in transition metal selenides. Experiment and comparison with LMTO numerical calculations 61
XANES study of sulphur K edges of transition metal (V, Cr, Mn, Fe, Co, Ni) monosulphides: experiment and LMTO numerical calculations 66
Bimetallic catalysts
in situ EXAFS study of the alloy catalyst Pd-Co (50%/50%)/SiO_2 93
Bremsstrahlung isochromat spectroscopy
electronic structure of silicon nitride 148
Bulk modulus
high-pressure–high-temperature study of $Hg_{1-x}Mn_xS$ 208

Ceramics
high-pressure high-temperature in situ diffraction studies of nanocrystalline ceramic materials at HASYLAB 184
Chalcogenides
high-pressure–high-temperature study of $Hg_{1-x}Mn_xS$ 208
Chemical bond
X-ray emission valence band spectra from $Zn_{1-x}Fe_xS$ excited by electrons 71
Coherence
thin film X-ray waveguides: 'Condenser systems' for experiments with X-ray beams of 0.1 μm dimension 9
Coherent effects
Moessbauer reflectometry of ultrathin multilayer Zr(10 nm)/[^{57}Fe(1.6 nm)/Cr(1.7 nm)×26]/Cr(50 nm) film using synchrotron radiation 322
II–VI compounds
high-pressure–high-temperature study of $Hg_{1-x}Mn_xS$ 208

Conductive polymer
EXAFS investigations of Pd-doped conductive polymers 98
Core excitons
core luminescence as a method of studying the relaxation processes in the outermost core of crystals 128
Core luminescence
core luminescence as a method of studying the relaxation processes in the outermost core of crystals 128
Covalent radii
EXAFS determination of local atomic structure of selected transition metals in CdSe matrix 89
Cryoprotection
DMSO-induced dehydration of DPPC membranes studied by X-ray diffraction, small-angle neutron scattering, and calorimetry 195

Defects
dependence of photoluminescence of silicon on conditions of pressure-annealing 258
Defect structure
influence of high hydrostatic pressure–high temperature treatment on defect structure of AlGaAs layers 279
Dehydration
DMSO-induced dehydration of DPPC membranes studied by X-ray diffraction, small-angle neutron scattering, and calorimetry 195
Density of states
examples of soft X-ray emission and inelastic scattering excited by synchrotron radiation 47
electronic structure of YM_2P_2 (M=Ni, Ru, Pd) compounds 56
Diffusion
structure and diffusion of oxygen and silicon interstitials in silicon 254
Diluted magnetic semiconductors
EXAFS determination of local atomic structure of selected transition metals in CdSe matrix 89
rare earth 4f states in $A^{IV}_{1-x}RE_xB^{VI}$ diluted magnetic semiconductors 121
Dimethyl sulfoxide
DMSO-induced dehydration of DPPC membranes studied by X-ray diffraction, small-angle neutron scattering, and calorimetry 195
Domain wall pinning
magnetic transmission X-ray microscopy: imaging magnetic domains via the X-ray magnetic circular dichroism 20
Dynamical X-ray diffraction
influence of hydrostatic pressure at the temperatures about 1500 K on defect structure of Czochralski silicon 246

Electronic band structure
the influence of the Fe 3d states on the electronic band structure of CdTe/Fe and bulk $Cd_{0.985}Fe_{0.015}Te$ crystal 137
Electronic structure
synchrotron-radiation photoemission and inverse photoemission studies of solids 114
electronic structure of silicon nitride 148
photoemission investigation of Gd–Cu compounds 153

Elsevier Science S.A.
PII: S0925-8388(99)00152-8

electronic structure of $TbMn_2$ and $DyMn_2$ single crystals 158
Ellipsometry
comparative studies of Si single crystal surface disorder by using various methods of electromagnetic wave scattering 302
characterisation of laser ablated silicon oxynitride thin films 309
EMA
characterisation of laser ablated silicon oxynitride thin films 309
Energy gap
formation of 4H and 8H polytypes in bulk $Zn_{1-x}Mg_xSe$ crystals 224
EXAFS
EXAFS data resolved into individual site occupation preferences in quaternary compounds with tetrahedral coordinated structure 80
EXAFS determination of local atomic structure of selected transition metals in CdSe matrix 89
in situ EXAFS study of the alloy catalyst Pd-Co (50%/50%)/SiO_2 93
EXAFS investigations of Pd-doped conductive polymers 98
EXAFS analysis of grain boundaries in nanocrystalline $Fe_{85}Zr_7B_6Cu_2$ alloys 103
multiple scattering calculations of Fe K EXAFS for Fe surfaces and nanocrystals 108
EXAFS spectroscopy
X-ray position-sensitive detector for the energy-dispersive EXAFS spectrometer 26
Extended defects
X-ray diffuse scattering from extended microdefects of orthorhombic symmetry for si single crystals 250

Fano effect
the influence of the Fe 3d states on the electronic band structure of CdTe/Fe and bulk $Cd_{0.985}Fe_{0.015}Te$ crystal 137
Fe
multiple scattering calculations of Fe K EXAFS for Fe surfaces and nanocrystals 108
Ferrocene
Fe:C_{60} bonds and structure analyzed by computational chemistry methods 297
Fluorescence
valency change of Cr, Fe, Cu, Er, Ce dopants inside oxide compounds under proton irradiation 167
application of resonance-enhanced X-ray standing waves to the study of layered structures by grazing-incidence X-ray reflectometry and secondary radiation 313
Fluorescence emission
the fluorescence emission from GaAs in the Laue case near the absorption edge 265
Free-electron laser
the free-electron laser project at DESY: concept and applications 1
Frequency of occurrence of structures
analysis of some aspects of synchrotron radiation measurements reported in the inorganic crystal structure database 219
fs pulses
the free-electron laser project at DESY: concept and applications 1
Fullerene
Fe:C_{60} bonds and structure analyzed by computational chemistry methods 297

GaAs
the fluorescence emission from GaAs in the Laue case near the absorption edge 265
X-ray diffraction and Raman scattering study of near-surface structure perfection of GaAs single crystals after anisotropic etching 289
Gadolinium
photoemission investigation of Gd–Cu compounds 153
Gallium nitride
lattice parameters of GaN single crystals, homoepitaxial layers and heteroepitaxial layers on sapphire 271
Gamma spectra
valency change of Cr, Fe, Cu, Er, Ce dopants inside oxide compounds under proton irradiation 167
GaSb
application of in situ surface scraping for extracting bulk component of XPS signal – example of $LiNbO_3$ and GaSb 162
GIXR
X-ray and magnetic study of epitaxial W/Gd/W and W/Tb/W thin films 333
Glassy reference standards
X-ray fluorescence analysis of multicomponent oxide materials: Accuracy control 76
Grain boundary
EXAFS analysis of grain boundaries in nanocrystalline $Fe_{85}Zr_7B_6Cu_2$ alloys 103
Grazing-incidence X-ray reflectometry
study of near-surface layers modified by ion implantation in Si wafers by grazing incidence X-ray reflectometry 337

$Hg_{1-x}Mn_xS$
high-pressure–high-temperature study of $Hg_{1-x}Mn_xS$ 208
High-pressure
high-pressure–high-temperature study of $Hg_{1-x}Mn_xS$ 208
High pressure crystallography
neutrons and synchrotron X-rays in materials science 174
High-pressure studies
high-pressure high-temperature in situ diffraction studies of nanocrystalline ceramic materials at HASYLAB 184
High-pressure treatment
influence of high hydrostatic pressure–high temperature treatment on defect structure of AlGaAs layers 279
HRTEM (high-resolution transmission electron microscopy)
formation of 4H and 8H polytypes in bulk $Zn_{1-x}Mg_xSe$ crystals 224
Hydrostatic pressure
dependence of oxygen precipitate size and strain on external stress at annealing of Cz-Si 241

Implantation
dependence of photoluminescence of silicon on conditions of pressure-annealing 258
study of near-surface layers modified by ion implantation in Si wafers by grazing incidence X-ray reflectometry 337
white beam pin-hole patterns of implanted layers 349
Impurity emission
core luminescence as a method of studying the relaxation processes in the outermost core of crystals 128
Infrared spectroscopy
X-ray powder diffraction study of cation distribution and the $Fd3m \rightarrow P4_132$ symmetry reduction in $Li_{0.5}Fe_{2.5}O_4/LiMn_2O_4$ spinel solid solutions 203
Inverse photoemission spectroscopy
synchrotron-radiation photoemission and inverse photoemission studies of solids 114
Ion implantation
interference fringes in plane-wave topography of $Al_xGa_{1-x}as$ epitaxial layers implanted with Se ions 343

Lanthanum gallate
crystal structure of $LaGaO_3$ and (La,Gd)GaO_3 solid solutions 213

Laser plasma light source
a tunable bench top light source for photoelectron spectroscopy: first results for alpha and delta Pu 14
Lattice parameter
high-pressure–high-temperature study of $Hg_{1-x}Mn_xS$ 208
formation of 4H and 8H polytypes in bulk $Zn_{1-x}Mg_xSe$ crystals 224
direct measurement of the lattice parameter of thick stable zinc-blende MgTe layer 276
Lattice parameters
lattice parameters of GaN single crystals, homoepitaxial layers and heteroepitaxial layers on sapphire 271
Laue case
the fluorescence emission from GaAs in the Laue case near the absorption edge 265
Laue method
white beam pin-hole patterns of implanted layers 349
Lead chalcogenides
rare earth 4f states in $A^{IV}_{1-x}RE_xB^{VI}$ diluted magnetic semiconductors 121
$LiFe_5O_8$
X-ray powder diffraction study of cation distribution and the $Fd3m \rightarrow P4_132$ symmetry reduction in $Li_{0.5}Fe_{2.5}O_4/LiMn_2O_4$ spinel solid solutions 203
Light scattering
X-ray diffraction and Raman scattering study of near-surface structure perfection of GaAs single crystals after anisotropic etching 289
$LiMn_2O_4$
X-ray powder diffraction study of cation distribution and the $Fd3m \rightarrow P4_132$ symmetry reduction in $Li_{0.5}Fe_{2.5}O_4/LiMn_2O_4$ spinel solid solutions 203
$LiNbO_3$
application of in situ surface scraping for extracting bulk component of XPS signal – example of $LiNbO_3$ and GaSb 162
Lithium ferrite
X-ray powder diffraction study of cation distribution and the $Fd3m \rightarrow P4_132$ symmetry reduction in $Li_{0.5}Fe_{2.5}O_4/LiMn_2O_4$ spinel solid solutions 203
Lithium ions in spinel structures
X-ray powder diffraction study of cation distribution and the $Fd3m \rightarrow P4_132$ symmetry reduction in $Li_{0.5}Fe_{2.5}O_4/LiMn_2O_4$ spinel solid solutions 203
Lithium–iron–manganese oxides
X-ray powder diffraction study of cation distribution and the $Fd3m \rightarrow P4_132$ symmetry reduction in $Li_{0.5}Fe_{2.5}O_4/LiMn_2O_4$ spinel solid solutions 203
LMTO
XANES study of K edges of Fe, Co, Ni, and Se in transition metal selenides. Experiment and comparison with LMTO numerical calculations 61
XANES study of sulphur K edges of transition metal (V, Cr, Mn, Fe, Co, Ni) monosulphides: experiment and LMTO numerical calculations 66
LPCVD
characterisation of laser ablated silicon oxynitride thin films 309
LRA
characterisation of laser ablated silicon oxynitride thin films 309
Luminescence
formation of 4H and 8H polytypes in bulk $Zn_{1-x}Mg_xSe$ crystals 224

Magnetic anisotropy
X-ray and magnetic study of epitaxial W/Gd/W and W/Tb/W thin films 333
Magnetic circular dichroism (X-MCD)
magnetic transmission X-ray microscopy: imaging magnetic domains via the X-ray magnetic circular dichroism 20
Magnetic domains
magnetic transmission X-ray microscopy: imaging magnetic domains via the X-ray magnetic circular dichroism 20
Magnetic EXAFS
magnetic X-ray absorption spectroscopy 37
Magnetic multilayers
magnetic X-ray absorption spectroscopy 37
Magnetic structure
neutrons and synchrotron X-rays in materials science 174
domain size effects in neutron and SR powder diffraction studies of some oxides 180
Magnetic transmission X-ray microscopy (M-TXM)
magnetic transmission X-ray microscopy: imaging magnetic domains via the X-ray magnetic circular dichroism 20
Magnetization reversal
magnetic transmission X-ray microscopy: imaging magnetic domains via the X-ray magnetic circular dichroism 20
Manganese perovskites
magnetic X-ray absorption spectroscopy 37
MgTe
direct measurement of the lattice parameter of thick stable zinc-blende MgTe layer 276
Microrelief
X-ray diffraction and Raman scattering study of near-surface structure perfection of GaAs single crystals after anisotropic etching 289
Micro-spot
thin film X-ray waveguides: 'Condenser systems' for experiments with X-ray beams of 0.1 μm dimension 9
Modulated crystals
anisotropic X-ray anomalous scattering by incommensurately modulated crystals 236
Modulated magnetic structure
domain size effects in neutron and SR powder diffraction studies of some oxides 180
Moessbauer spectroscopy
Moessbauer reflectometry of ultrathin multilayer Zr(10 nm)/[^{57}Fe(1.6 nm)/Cr(1.7 nm)×26]/Cr(50 nm) film using synchrotron radiation 322
Molecular beam epitaxy
direct measurement of the lattice parameter of thick stable zinc-blende MgTe layer 276
Mössbauer spectroscopy
Fe:C_{60} bonds and structure analyzed by computational chemistry methods 297
Multilayers
application of resonance-enhanced X-ray standing waves to the study of layered structures by grazing-incidence X-ray reflectometry and secondary radiation 313
Moessbauer reflectometry of ultrathin multilayer Zr(10 nm)/[^{57}Fe(1.6 nm)/Cr(1.7 nm)×26]/Cr(50 nm) film using synchrotron radiation 322

Nanocrystalline alloy
EXAFS analysis of grain boundaries in nanocrystalline $Fe_{85}Zr_7B_6Cu_2$ alloys 103
multiple scattering calculations of Fe K EXAFS for Fe surfaces and nanocrystals 108
Nanocrystals
in situ EXAFS study of the alloy catalyst Pd-Co (50%/50%)/SiO_2 93
multiple scattering calculations of Fe K EXAFS for Fe surfaces and nanocrystals 108

Neutron diffraction
domain size effects in neutron and SR powder diffraction studies of some oxides 180
analysis of some aspects of synchrotron radiation measurements reported in the inorganic crystal structure database 219
Neutrons
neutrons and synchrotron X-rays in materials science 174
Non-radiative decay
core luminescence as a method of studying the relaxation processes in the outermost core of crystals 128
Nuclear resonant scattering
Moessbauer reflectometry of ultrathin multilayer Zr(10 nm)/[^{57}Fe(1.6 nm)/Cr(1.7 nm)×26]/Cr(50 nm) film using synchrotron radiation 322
Nucleation
dependence of oxygen precipitate size and strain on external stress at annealing of Cz-Si 241

Optical absorption
valency change of Cr, Fe, Cu, Er, Ce dopants inside oxide compounds under proton irradiation 167
Orthorhombic symmetry
X-ray diffuse scattering from extended microdefects of orthorhombic symmetry for si single crystals 250
Oxide materials
X-ray fluorescence analysis of multicomponent oxide materials: Accuracy control 76
Oxygen precipitates
dependence of oxygen precipitate size and strain on external stress at annealing of Cz-Si 241
influence of hydrostatic pressure at the temperatures about 1500 K on defect structure of Czochralski silicon 246

Pd catalyst
EXAFS investigations of Pd-doped conductive polymers 98
Pd-Co
in situ EXAFS study of the alloy catalyst Pd-Co (50%/50%)/SiO_2 93
Perovskite-like structures
crystal structure of $LaGaO_3$ and (La,Gd)GaO_3 solid solutions 213
Phase transitions
high-pressure–high-temperature study of $Hg_{1-x}Mn_xS$ 208
Phonon dispersion relations
neutrons and synchrotron X-rays in materials science 174
Phosphides
electronic structure of YM_2P_2 (M=Ni, Ru, Pd) compounds 56
Phospholipid
DMSO-induced dehydration of DPPC membranes studied by X-ray diffraction, small-angle neutron scattering, and calorimetry 195
Photodiode array
X-ray position-sensitive detector for the energy-dispersive EXAFS spectrometer 26
Photoelectrons
application of resonance-enhanced X-ray standing waves to the study of layered structures by grazing-incidence X-ray reflectometry and secondary radiation 313
Photoelectron spectroscopy
examples of soft X-ray emission and inelastic scattering excited by synchrotron radiation 47
Photoemission
a tunable bench top light source for photoelectron spectroscopy: first results for alpha and delta Pu 14
the influence of the Fe 3d states on the electronic band structure of CdTe/Fe and bulk $Cd_{0.985}Fe_{0.015}Te$ crystal 137
photoemission investigation of Gd–Cu compounds 153
Photoemission spectroscopy
synchrotron-radiation photoemission and inverse photoemission studies of solids 114
Photoluminescence
dependence of photoluminescence of silicon on conditions of pressure-annealing 258
Pin-hole limited beam
white beam pin-hole patterns of implanted layers 349
Plutonium
a tunable bench top light source for photoelectron spectroscopy: first results for alpha and delta Pu 14
Point defects
structure and diffusion of oxygen and silicon interstitials in silicon 254
Polytypism
formation of 4H and 8H polytypes in bulk $Zn_{1-x}Mg_xSe$ crystals 224
Powder diffraction
domain size effects in neutron and SR powder diffraction studies of some oxides 180
crystal structure of $LaGaO_3$ and (La,Gd)GaO_3 solid solutions 213
formation of 4H and 8H polytypes in bulk $Zn_{1-x}Mg_xSe$ crystals 224
Proton irradiation
valency change of Cr, Fe, Cu, Er, Ce dopants inside oxide compounds under proton irradiation 167

Quantum chemical simulation
structure and diffusion of oxygen and silicon interstitials in silicon 254
Quantum chemistry
Fe:C_{60} bonds and structure analyzed by computational chemistry methods 297

Raman scattering
examples of soft X-ray emission and inelastic scattering excited by synchrotron radiation 47
Rare earth
X-ray and magnetic study of epitaxial W/Gd/W and W/Tb/W thin films 333
Rare earth intermetallics
magnetic X-ray absorption spectroscopy 37
Rare earth ions
rare earth 4f states in $A^{IV}_{1-x}RE_xB^{VI}$ diluted magnetic semiconductors 121
Rare-earth materials
examples of soft X-ray emission and inelastic scattering excited by synchrotron radiation 47
Rare earth-transition metal compounds
electronic structure of $TbMn_2$ and $DyMn_2$ single crystals 158
Relaxation of core excitations
core luminescence as a method of studying the relaxation processes in the outermost core of crystals 128
Resonant photoemission
photoemission investigation of Gd–Cu compounds 153
Resonant X-ray diffraction
anisotropic X-ray anomalous scattering by incommensurately modulated crystals 236
Rietveld refinement
X-ray powder diffraction study of cation distribution and the $Fd3m \rightarrow P4_132$ symmetry reduction in $Li_{0.5}Fe_{2.5}O_4/LiMn_2O_4$ spinel solid solutions 203

Scattering
DMSO-induced dehydration of DPPC membranes studied by X-ray diffraction, small-angle neutron scattering, and calorimetry 195
Segregation
in situ EXAFS study of the alloy catalyst Pd-Co (50%/50%)/SiO_2 93

Semiconductors
synchrotron-radiation photoemission and inverse photoemission studies of solids 114
lattice parameters of GaN single crystals, homoepitaxial layers and heteroepitaxial layers on sapphire 271
influence of high hydrostatic pressure–high temperature treatment on defect structure of AlGaAs layers 279
II–VI semiconductors
formation of 4H and 8H polytypes in bulk $Zn_{1-x}Mg_xSe$ crystals 224
Semimagnetic semiconductors
the influence of the Fe 3d states on the electronic band structure of CdTe/Fe and bulk $Cd_{0.985}Fe_{0.015}Te$ crystal 137
Silicon
dependence of oxygen precipitate size and strain on external stress at annealing of Cz-Si 241
structure and diffusion of oxygen and silicon interstitials in silicon 254
dependence of photoluminescence of silicon on conditions of pressure-annealing 258
comparative studies of Si single crystal surface disorder by using various methods of electromagnetic wave scattering 302
white beam pin-hole patterns of implanted layers 349
Silicon carbide
XPS and XRD study of crystalline 3C-SiC grown by sublimation method 143
high-pressure high-temperature in situ diffraction studies of nanocrystalline ceramic materials at HASYLAB 184
Silicon nitride
electronic structure of silicon nitride 148
Silicon oxynitride
characterisation of laser ablated silicon oxynitride thin films 309
Silicon single crystals
influence of hydrostatic pressure at the temperatures about 1500 K on defect structure of Czochralski silicon 246
Single crystal
electronic structure of $TbMn_2$ and $DyMn_2$ single crystals 158
Sintering
high-pressure high-temperature in situ diffraction studies of nanocrystalline ceramic materials at HASYLAB 184
Site occupation preferences
EXAFS data resolved into individual site occupation preferences in quaternary compounds with tetrahedral coordinated structure 80
Soft X-ray emission
an ultrathin buried Si layer in GaAs studied by soft X-ray emission spectroscopy and surface X-ray diffraction: theory and experiment 31
Soft X-ray spectroscopy
examples of soft X-ray emission and inelastic scattering excited by synchrotron radiation 47
Solid solutions
crystal structure of $LaGaO_3$ and $(La,Gd)GaO_3$ solid solutions 213
Solid surface preparation
application of in situ surface scraping for extracting bulk component of XPS signal – example of $LiNbO_3$ and GaSb 162
Specular reflection
X-ray diffraction and Raman scattering study of near-surface structure perfection of GaAs single crystals after anisotropic etching 289
Specular reflectivity
application of resonance-enhanced X-ray standing waves to the study of layered structures by grazing-incidence X-ray reflectometry and secondary radiation 313
Spinel-type metal oxides
X-ray powder diffraction study of cation distribution and the $Fd3m \rightarrow P4_132$ symmetry reduction in $Li_{0.5}Fe_{2.5}O_4/LiMn_2O_4$ spinel solid solutions 203
SR diffraction
domain size effects in neutron and SR powder diffraction studies of some oxides 180
Strain
high-pressure high-temperature in situ diffraction studies of nanocrystalline ceramic materials at HASYLAB 184
Stress
dependence of photoluminescence of silicon on conditions of pressure-annealing 258
Structural properties
Moessbauer reflectometry of ultrathin multilayer Zr(10 nm)/[^{57}Fe(1.6 nm)/Cr(1.7 nm)×26]/Cr(50 nm) film using synchrotron radiation 322
Structure determination
crystal structure of $LaGaO_3$ and $(La,Gd)GaO_3$ solid solutions 213
Structure perfection
X-ray diffraction and Raman scattering study of near-surface structure perfection of GaAs single crystals after anisotropic etching 289
Surface
multiple scattering calculations of Fe K EXAFS for Fe surfaces and nanocrystals 108
Surface disorder
comparative studies of Si single crystal surface disorder by using various methods of electromagnetic wave scattering 302
Surface roughness
comparative studies of Si single crystal surface disorder by using various methods of electromagnetic wave scattering 302
Surface studies
XPS and XRD study of crystalline 3C-SiC grown by sublimation method 143
Surface treatment
X-ray diffraction and Raman scattering study of near-surface structure perfection of GaAs single crystals after anisotropic etching 289
Synchrotron radiation
the free-electron laser project at DESY: concept and applications 1
X-ray position-sensitive detector for the energy-dispersive EXAFS spectrometer 26
Synchrotron radiation application
analysis of some aspects of synchrotron radiation measurements reported in the inorganic crystal structure database 219
Synchrotron radiation photoelectron spectroscopy
rare earth 4f states in $A^{IV}_{1-x}RE_xB^{VI}$ diluted magnetic semiconductors 121
Synchrotron X-rays
neutrons and synchrotron X-rays in materials science 174

Ternary intermetallics
electronic structure of YM_2P_2 (M=Ni, Ru, Pd) compounds 56
Tetrahedral coordinated quaternary compounds
EXAFS data resolved into individual site occupation preferences in quaternary compounds with tetrahedral coordinated structure 80
Thin films
X-ray and magnetic study of epitaxial W/Gd/W and W/Tb/W thin films 333
study of near-surface layers modified by ion implantation in Si wafers by grazing incidence X-ray reflectometry 337
Thin layers
direct measurement of the lattice parameter of thick stable zinc-blende MgTe layer 276
Transition metals
examples of soft X-ray emission and inelastic scattering excited by synchrotron radiation 47

Transition metal selenides
XANES study of K edges of Fe, Co, Ni, and Se in transition metal selenides. Experiment and comparison with LMTO numerical calculations 61
Transition metal sulphides
XANES study of sulphur K edges of transition metal (V, Cr, Mn, Fe, Co, Ni) monosulphides: experiment and LMTO numerical calculations 66

VUV spectral range
the free-electron laser project at DESY: concept and applications 1

Waveguide
thin film X-ray waveguides: 'Condenser systems' for experiments with X-ray beams of 0.1 μm dimension 9
Wide band gap semiconductors
strain relaxation of $Al_xGa_{1-x}N$ epitaxial layers on GaN and SiC substrates 284
Wide-band semiconductors
X-ray emission valence band spectra from $Zn_{1-x}Fe_xS$ excited by electrons 71

X-ray absorption
XANES study of K edges of Fe, Co, Ni, and Se in transition metal selenides. Experiment and comparison with LMTO numerical calculations 61
XANES study of sulphur K edges of transition metal (V, Cr, Mn, Fe, Co, Ni) monosulphides: experiment and LMTO numerical calculations 66
EXAFS determination of local atomic structure of selected transition metals in CdSe matrix 89
EXAFS investigations of Pd-doped conductive polymers 98
EXAFS analysis of grain boundaries in nanocrystalline $Fe_{85}Zr_7B_6Cu_2$ alloys 103
X-ray analysis
X-ray fluorescence analysis of multicomponent oxide materials: Accuracy control 76
X-ray diffraction
an ultrathin buried Si layer in GaAs studied by soft X-ray emission spectroscopy and surface X-ray diffraction: theory and experiment 31
XPS and XRD study of crystalline 3C-SiC grown by sublimation method 143
high-pressure–high-temperature study of $Hg_{1-x}Mn_xS$ 208
lattice parameters of GaN single crystals, homoepitaxial layers and heteroepitaxial layers on sapphire 271
direct measurement of the lattice parameter of thick stable zinc-blende MgTe layer 276
influence of high hydrostatic pressure–high temperature treatment on defect structure of AlGaAs layers 279
strain relaxation of $Al_xGa_{1-x}N$ epitaxial layers on GaN and SiC substrates 284
X-ray diffuse scattering
X-ray diffuse scattering from extended microdefects of orthorhombic symmetry for si single crystals 250
X-ray emission
X-ray emission valence band spectra from $Zn_{1-x}Fe_xS$ excited by electrons 71
X-ray emission spectra
electronic structure of YM_2P_2 (M=Ni, Ru, Pd) compounds 56
X-ray fluorescence
examples of soft X-ray emission and inelastic scattering excited by synchrotron radiation 47
X-ray interference phenomena
interference fringes in plane-wave topography of Al_xGa_{1-x}as epitaxial layers implanted with Se ions 343
X-ray magnetic circular dichroism
magnetic X-ray absorption spectroscopy 37
X-ray microscopy
thin film X-ray waveguides: 'Condenser systems' for experiments with X-ray beams of 0.1 μm dimension 9
X-ray phase contrast
thin film X-ray waveguides: 'Condenser systems' for experiments with X-ray beams of 0.1 μm dimension 9
X-ray photoelectron spectroscopy
XPS and XRD study of crystalline 3C-SiC grown by sublimation method 143
electronic structure of silicon nitride 148
application of in situ surface scraping for extracting bulk component of XPS signal – example of $LiNbO_3$ and GaSb 162
X-ray powder diffraction
high-pressure high-temperature in situ diffraction studies of nanocrystalline ceramic materials at HASYLAB 184
analysis of some aspects of synchrotron radiation measurements reported in the inorganic crystal structure database 219
X-ray reflectivity
strain relaxation of $Al_xGa_{1-x}N$ epitaxial layers on GaN and SiC substrates 284
X-ray standing waves
application of resonance-enhanced X-ray standing waves to the study of layered structures by grazing-incidence X-ray reflectometry and secondary radiation 313
X-ray waveguide
application of resonance-enhanced X-ray standing waves to the study of layered structures by grazing-incidence X-ray reflectometry and secondary radiation 313

$Zn_{1-x}Mg_xSe$
formation of 4H and 8H polytypes in bulk $Zn_{1-x}Mg_xSe$ crystals 224
